May regulate T-cell activation. SUBUNIT: Associates with p56-lck (By similarity). SUBCELLULAR LOCATION: Type I membrane protein. SIMILARITY: Contains 3 immunoglobulin-like C2-type domains. SIMILARITY: Contains 1 immunoglobulin-like V-type domain.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 301

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   REVISIONS TO 12-97 (PROTEIN WIS).
                                                                                                                                                                                                                                                                                                                               and all of the CHI region.

All of the CHI region, all miscritaneous: Disease protein ZUC lack most of the V region, all of the CHI region, and part of the hinge compared with normal the CHI region, and part of the hinge compared with normal gamma-3 heavy chains.

MISCELLANEOUS: Disease protein OMM may represent an allelic form or another gamma chain subclass.

MISCELLANEOUS: The hinge region in gamma-3 chains is about four times as long as in other gamma chains and contains three identical 15-residue segments preceded by a similar 17-residue
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Ref 2.
